acting today.**

# Who we are

## Data

Company name: **S4E**

Established date: **2000**

Number of employees: **62**

Channel Partners: **over 200**

**2025 revenue: 121 625 000 €**

Leading IT solutions distributor committed to empowering businesses with cutting-edge technologies and expert services. Our portfolio encompasses comprehensive solutions in data storage, networking, and server infrastructure - designed to optimize performance, enhance security, and drive operational efficiency.

We proudly partner with globally recognized technology leaders, including Dell Technologies, Huawei, Commvault, Quantum, Nutanix, Hitachi Vantara and xFusion. This collaboration ensures our clients gain access to the most advanced and innovative solutions available in the market.

Beyond technology distribution, we serve as an authorized training center, delivering certified IT courses and professional development programs. Our mission is to equip organizations and IT professionals with the knowledge and skills required to thrive in today's dynamic digital landscape.

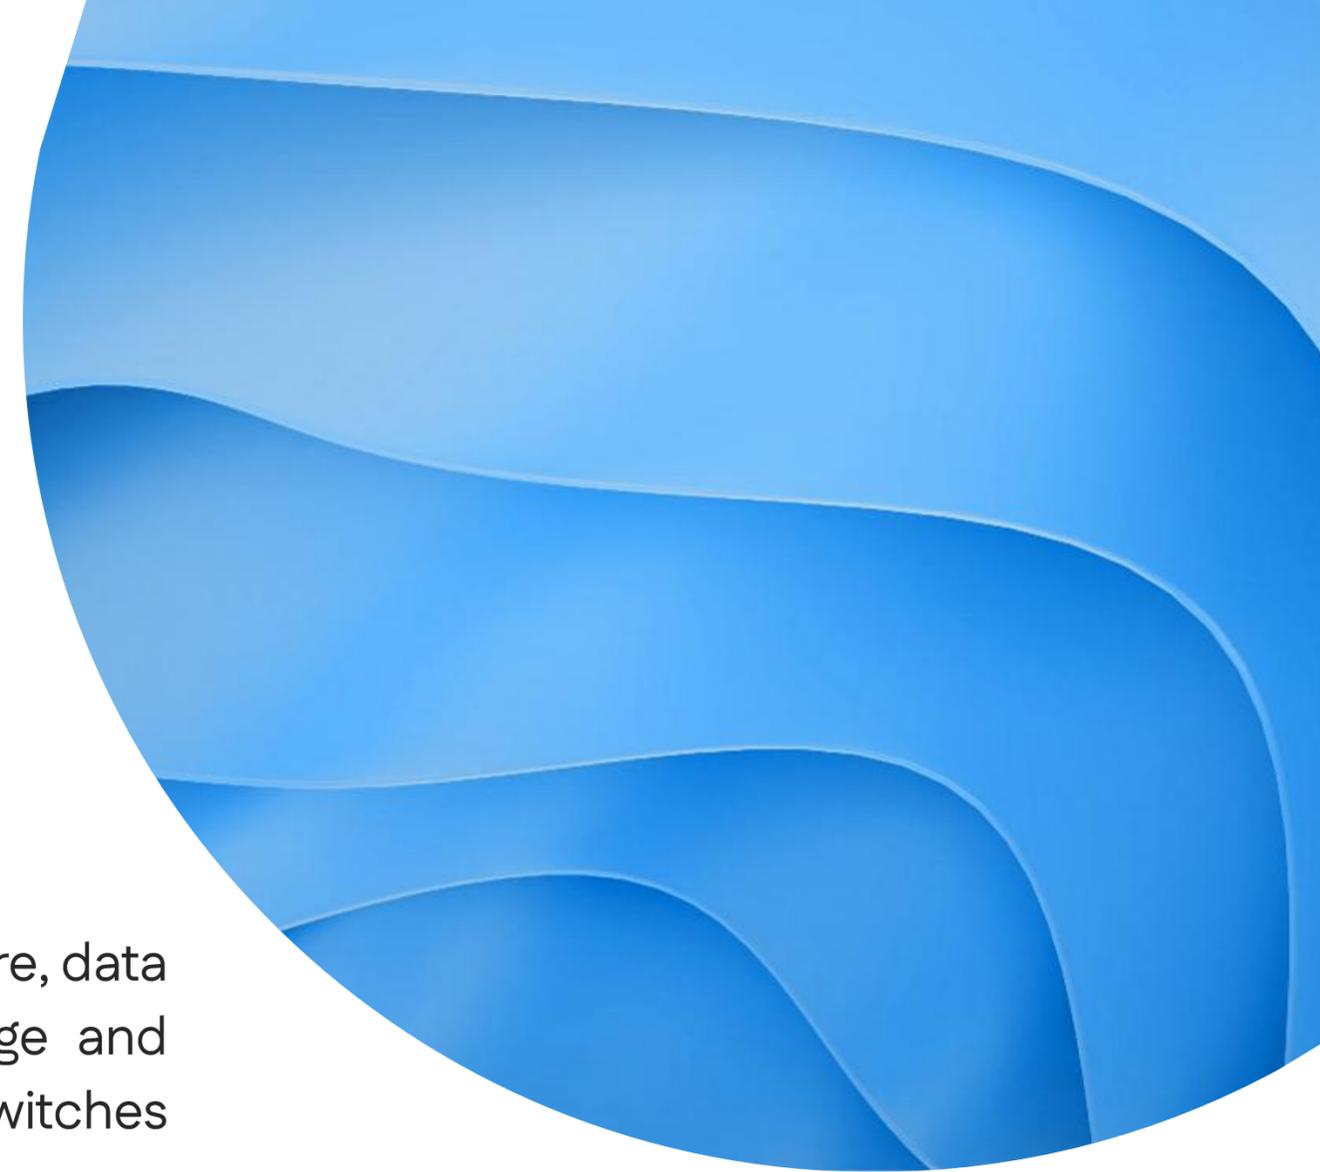

By combining world-class technologies with expert guidance and education, we help our clients achieve sustainable growth, strengthen resilience, and stay ahead in an ever-evolving business environment.

# Business brief

**As a distributor of advanced IT solutions, we specialize in the following areas:**

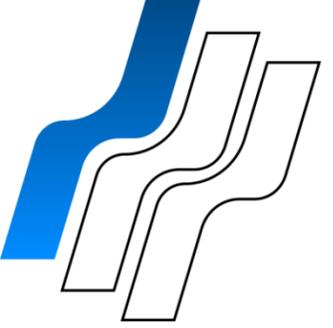

- **Storage** – Comprehensive solutions for secure data storage, sharing, and long-term archiving, including disk arrays, tape libraries, and software for managing storage environments.
- **Networking** – Active network devices, SAN, LAN, and WLAN infrastructure, data transfer accelerators, network performance analysis tools, log storage and analysis, local and wide area network security, as well as carrier-grade switches and solutions for metropolitan networks.
- **Hyperconverged Platforms (HCI)** – Integrated hardware platforms with virtualization software, ensuring scalability and simplified infrastructure management.
- **Servers** – High-performance mid-range and enterprise-class servers, tailored for the most demanding environments.

# Business brief

- **Software** – Advanced systems for data archiving and protection, solutions for private and public clouds, and tools for effective enterprise information lifecycle management.
- **Passive Elements and Data Center Equipment** – Products and devices that, combined with other S4E offerings, enable comprehensive "turnkey" Data Center design and delivery.
- **Security Solutions** – Adaptive security systems, offering comprehensive IT protection for businesses.
- **Cloud Solutions** – Tools supporting the creation of private, public, and hybrid cloud environments, adapted to dynamic business needs.

# S4E product offer

- \* PowerEdge R, T
- \* PowerEdge C,  
MX, FX
- \* PowerEdge SI

## VIRTUALIZATION

### Platforms:

- \* Nutanix AHV
- \* Huawei  
FusionSphere

### \* Huawei

FusionCube

### Professional

### Services:

Consulting,  
Implementations,  
Training, Demo Room

## SOFTWARE

- \* StoreNext  
(Quantum)
- \* ManageOne DC  
(Huawei)
- \* IDC (Huawei)
- \* Commvault Cloud  
Platform
- \* iMaster / eSight  
(Huawei)

## SECURITY

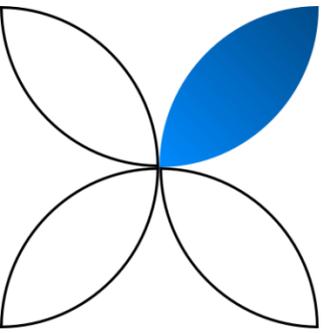

### Commvault

### Threat Scan:

Scanning backups  
for malware and  
anomalies

## DATA CENTER EQUIPMENT

- \*Server cabinets
- \* Ventilation and  
cooling systems
- \* Backup power  
systems
- \*Structured cabling
- \*Direct Liquid  
Cooling (DCLC™)  
systems

# S4E services

## Training

S4E is a leading training center, an Authorized Huawei Learning Partner (HALP), and the only authorized distributor of Commvault training in Poland.

We offer certified training in Polish and English, delivered in Poland and throughout Europe. Our comprehensive educational paths fully prepare participants for recognized certification exams.

We also provide proprietary training programs in Dell Technologies, Quantum, Nutanix, and Hitachi technologies.

These courses are designed to equip participants with practical knowledge and prepare them for industry certifications.

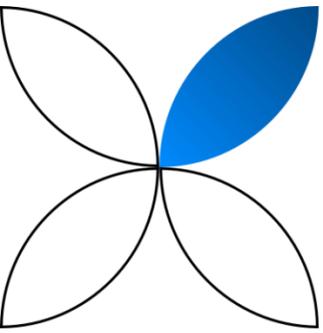

## Implementations

S4E S.A. offers a full range of implementation services, from design to execution. We support clients with on-site product configuration, organize infrastructure administration workshops (pre and post-implementation), and provide hardware resources.

Our activities include:

- IT architecture design.
- Infrastructure analysis.
- Project support.
- Testing and verification.

Our goal is to build modern and efficient IT architectures.

# S4E services

## Service

S4E S.A. is an authorized and certified service partner of leading global technology manufacturers. We specialize in supporting solutions from Commvault (CASP), Huawei (Data Communication CSP, Huawei IT), Hitachi Vantara, Quantum, and xFusion. Additionally, we provide service support for Dell Technologies devices.

We offer comprehensive service solutions that ensure the continuity of operations and optimal performance of your IT infrastructure, including:

- Telephone technical support.
- IT infrastructure monitoring.
- Service contract management.
- IT environment administration.
- Service stock management.

Our team consists of highly qualified specialists who guarantee top-level technical support, fast response times, and effective solutions. We operate based on the confirmed ISO 9001 quality standard, which is a guarantee of our professionalism and reliability.

## CERTIFICATE

Certificate Registration No.: 12 100 46152 TMS / Order No.: 73427661

The Certification Body  
of TÜV SÜD Management Service GmbH  
certifies that the organization

**S4E S.A.**  
ul. Inflancka 4B, 00-189 Warszawa

He has a proven track record of success in developing cloud practice, increasing service sales, and optimizing business processes. An expert in the Polish public sector and managing relationships with key suppliers at the CxO level – strategy, escalation, development area.

# We are a part of ALSO Group

ALSO was founded in 1984 and has evolved into one of the leading technology providers in Europe. In the process, the business models have been systematically expanded from a traditional ICT distributor to an end-to-end service provider, with a broad portfolio of hard- and software as well as offerings for IT solutions, cloud, IoT, and other digital platforms.

The Group has a portfolio of over 800 vendors, including all major global market leaders, in the product categories of hardware, software and IT services. ALSO offers vendors access to a large number of resellers, who, can access a wide range of other services, in addition to the traditional ICT wholesale offerings, including cloud and as-a-service, logistics, finance and IT services on a tailored basis. From the development of complex IT landscapes and the provision and maintenance of hard- and software to the return, recycling, and remarketing of IT hardware in the spirit of the circular economy, ALSO offers all services from a single source.

With its three business models Supply, Solutions, and Service, ALSO serves the ICT industry in two marketing channels: transactional, via the purchase of hard- and software, and subscription-based (consumptional) with cloud-based as-a-service offerings, including possible hybrid solutions.
